Jakarta City, West Java, Indonesia

I am an active fifth-semester student of the Information Technology S1 at Faculty of Computer Science, Brawijaya University batch of 2021. I have a keen interest and skills in both front-end and back-end, demonstrated by working on important projects alongside professors. I am actively seeking opportunities to contribute to impactful projects and am committed to utilizing insights related to front-end and back-end for development in the industrial revolution.

EDUCATION

Universitas Brawijaya - Malang, Indonesia

Aug 2021 -

Undergraduate in Information Technology

- GPA: 3.93/4.00
- Relevant Coursework: Web application programming, Integrative programming, Implementation and Evaluation of Information Systems

SMAN 4 JAKARTA - Jakarta, Indonesia

Jul 2018 - May 2021

High School Diploma in Science

FREELANCE / INTERNSHIP

BTPN Syariah X Rakamin Academy - Jakarta, Indonesia

Jan 2023 - Feb 2023

Project-Based Internship Fullstack Developer

- Gained hands-on experience with essential tech tools like JavaScript, MySQL, and Git used in IT service development. Engaging with these tools was crucial in understanding their role within the bank's tech landscape.
- Applied Full Stack methodologies by working on JavaScript for front-end, MySQL for databases, and Git for version control. These projects were geared towards enhancing user experiences in alignment with BTPN's tech infrastructure.
- Actively contributed to integrating JavaScript frameworks, optimizing MySQL databases, and utilizing Git for collaborative development. This experience deepened my grasp of aligning these tools to create user-focused solutions for BTPN Syariah's objectives.
- Tech Stack : Java, Golang, Vue JS, JavaScript, SQL, Git

FILKOM UB - Malang, Indonesia

Feb 2023 - Jun 2023

Laboratory Assistant, Database System

- Teaching ERD and Relational Mapping to practitioners for a foundational grasp of database basics.
- Demonstrating the significance of DDL and DML in crafting simple schemas and databases for class projects.
- Equipping practitioners with ERD visualization and relational database creation skills through practical lessons on DDL and DML.
- Tech Stack : SQL, MySQL, MariaDB

Kementerian Pendidikan dan Kebudayaan (Ministry of Education and Culture Republic Indonesia) - Malang, Indonesia

Sep 2023 - Present

Staff Public Relation at GEMASTIK XVI University of Brawijaya

- Being the primary contact person responsible for managing communication and coordination with external participants, ensuring their seamless integration and involvement in various activities or events.
- Monitoring and evaluating the effectiveness of communication strategies by tracking engagement metrics, response rates, and participant feedback to continuously improve the information broadcast process for all participants involved.
- Facilitating an extensive information dissemination process tailored for all participants involved, utilizing various communication channels such as email, social media platforms, and dedicated communication tools. This involves reaching out to a wide audience and providing comprehensive details about upcoming events, schedules, guidelines, and necessary updates.

KBMTI FILKOM UB - Malang, Indonesia

Sep 2022

Staff Facilitator at FEEL-IT 2022

- Accompanying new students in the Faculty of Computer Science (Filkom) by assisting them with assignments, explaining course materials, and guiding them through the academic transition process.
- Active participation in various extracurricular activities organized by the Operating Systems Community (OSpect) to enhance practical skills and expand knowledge within the field of computer science.
- Additionally, facilitating and coordinating groups to efficiently carry out their assigned job descriptions (jobdesk) within the academic and organizational context, contributing to a cohesive and productive environment.

KBMTI FILKOM UB - Malang, Indonesia

Jun 2022 - Dec 2022

Staff Public Relation at IT-Mosphere 2022

- As the Social Media Manager for IT-Mosphere, my role encompasses overseeing all social media activities and strategies.
- Regular assessments are conducted to track audience growth, post performance, and engagement rates, aiming for a minimum 20% increase in follower engagement quarterly.
- This involves the development and execution of comprehensive posting schedules across various platforms, ensuring a diverse range of engaging content creation including articles, visuals, and interactive media.
- Managing a minimum of 10+ high-quality posts per week is a part of this responsibility.

Skills, Achievements & Other Experience

- **Community Volunteer** (2023): Volunteering with the Indonesian Codepolitan Community offers an opportunity to engage as a volunteer with Alibaba Cloud. Volunteers partake in organizing tech workshops, mentoring, and contributing to tech-related content, promoting Alibaba Cloud services within the local tech community. This collaboration fosters skill-building, networking, and knowledge-sharing in cloud computing technologies.
- **Programming Languages:** Java, JavaScript, PHP
- **Framework:** ReactJs, NodeJs, Laravel
- **Skills:** Object-Oriented Programming, Web Development, REST API
- **Tools and Stacks:** Git, Github, Gitlab, MySQL, MariaDB, HTML, CSS, Bootstrap, Figma
